## Body & Paint Polishing-Systems

## Body & Paint

### Reliable polishing of all common coatings

#### Requirement:

- Process orientation to industrial standards
- Fast and brilliant results
- Economical material consumption
- Long-lasting surface protection
- Silicon-free surface

#### Work assignment:

- Preparing/Matting of automotive clear coats
- Eliminating of paint defects (inclusion, spray, "paint tears"/"runs")
- Adapting blending methods

#### Users:

- Workshops
- Paintshops

**DESIRED RESULT**

Standard surface after deep grinding as an ideal basis for following polishing steps.

Perfect surface with radiant gloss on bright paints.

Absolutely hologram-free surface with exclusive shine, even on dark coatings.

Protected, noticeably smoother, silicone-free surface with high gloss value and perfect water beading.

\*\*All systems listed are flexible and to be understood as recommendations. The majority of all applications in practice are covered. At each polishing level, further products are optionally available which can replace individual polishes if required. You can find the entire polish program at [www.menzerna.com](http://www.menzerna.com).

\*\*VOC-free means free from Volatile Organic Compounds according to DIN EN ISO 11890-2.
