### **“3 in 1”: One shot – three hits**

The new “3 in 1” polish from Menzerna is unique in the world, fulfilling three wishes at once: Cut, gloss and protection.

Menzerna is the first to succeed in harmonising the active ingredients of three different products so that “3 in 1” offers full performance where three polishes were previously required. “3 in 1” is a polish that removes 3000 grit sanding marks, guarantees a perfect high-gloss finish and seals the coating to repel dirt. Menzerna “3 in 1” covers the entire polishing process. Thanks to its ease of application and time savings, this polish is a true innovation and a highlight for professionals and polishing newcomers alike. This all-rounder is also 100 percent silicone-free, which means that painting over it does not present a problem.

“3 in 1” is suitable for rotative or eccentric processing with polishing pads or manually with a microfibre cloth.

The polish is available in a 250 millilitre and 1 litre container.

Automechanika: Halle 11.1 / exhibition stand D19

**About Menzerna:**

Menzerna is Europe’s leading developer and manufacturer of polishing agents for industry and trades. Menzerna products optimise polishing and cleaning processes, making them more economical. Menzerna specialists are always working on even better products and processes. Every fifth of the more than 200 formulations is less than five years old. Customers are supported through a worldwide network of subsidiaries, specialist dealers and application technicians. 125 years of experience, comprehensive formulation know-how and a precise understanding of customer requirements make Menzerna an innovative and reliable premium supplier.
