

Final Finish 3000 - Classic Swirl Remover -

Product Description

Menzerna Final Finish 3000 (FF 3000) is a versatile high-gloss polish for all automotive clear coats. FF 3000 removes polishing marks and guarantees a perfect deep gloss.

General information:		Chemical information:	
Product Group:	Finish	Density:	1,0 kg/l
Category:	Standard	Viscosity:	9-15 Pas
Cut:	3	Technical information:	
Gloss:	9		
Application:	Detailing/ Paint shops	Maximum abrasion:	Hologram removal
Storage:	15-25°C, avoid frost and direct sunlight	Polishing tools:	Soft Cut Foam Pad Medium Cut Foam Pad
Colour:	White	Rotational speed:	Rotary: 800–1,200 rpm Orbital: depends on manufacturer
Volumes:	250 ml: 22029.281.001 1 L: 22029.261.001		

Recommended Usage

- Clean surface thoroughly prior to polishing.
- Shake the bottle prior to use and apply a small quantity of the product onto the polishing pad (a pea-sized drop is sufficient for an area measuring approx. 40 x 40 cm).
- Use the Menzerna Soft Cut Foam Pad to remove fine scratches, shading, smears and holograms. For more cut, use the Medium Cut Foam Pad. If using a new or dry pad, apply sufficient polish to prevent the formation of holograms.
- Use either a rotary or an orbital polishing machine and use the cross-coating method. We recommend an orbital polishing machine to achieve a perfect finish. Apply light pressure at the start of the polishing process. Take away the pressure in the final cycles and increase the speed of the polishing machine by 10%.
- At first, the polish will seem a little milky and should be worked in until only a slightly transparent/oily film is visible.
- Once you have finished polishing, remove any residue with our Premium Microfiber cloth, without applying any pressure.
- Fine scratches, shading, smears and holograms have now been removed. Your surface boasts a brilliant finish and can now be sealed with a Menzerna Protection product.
