

Super Finish 3500 - High Gloss Swirl Remover -

Product Description

Menzerna Super Finish 3500 (SF 3500) is a versatile high-gloss polish for all automotive clear coats. SF 3500 removes polishing marks, micro-scratches and holograms for a brilliant deep gloss.

| General information: | Chemical information: |
|--|---|
| Product Group: Finish | Density: 1,1 kg/l |
| Category: Alternative | Viscosity: 8-15 Pas |
| Cut: 3 | Technical information: |
| Gloss: 10 | |
| Application: Detailing/ Paint shops | |
| Storage: 5-30°C, avoid frost and direct sunlight | |
| Colour: Gray | Maximum abrasion: Hologram removal |
| Volumes: 250 ml: 22911.281.001 1 L: 22911.261.001 | Polishing tools: Medium Cut Foam Pad Soft Cut Foam Pad |
| | Rotational speed: Rotary: 800–1,200 rpm Orbital: depends on manufacturer |

Recommended usage

1. Clean surface thoroughly prior to polishing.
2. Shake the bottle prior to use and apply a small quantity of the product onto the polishing pad (a pea-sized drop is sufficient for an area measuring approx. 40 x 40 cm).
3. Use the Menzerna Soft Cut Foam Pad to remove fine scratches, shading, smears and holograms. For more cut, use the Medium Cut Foam Pad. If using a new or dry pad, apply sufficient polish to prevent the formation of holograms.
4. Use either a rotary or an orbital polishing machine and use the cross-coating method.
We recommend an orbital polishing machine to achieve a perfect finish. Apply light pressure at the start of the polishing process. Take away the pressure in the final cycles and increase the speed of the polishing machine by 10%.
5. At first, the polish will seem a little milky and should be worked in until only a slightly transparent/oily film is visible.
6. Once you have finished polishing, remove any residue with our Premium Microfiber cloth, without applying any pressure.
7. Fine scratches, shading, smears and holograms have now been removed.
Your surface boasts brilliant deep gloss and can now be sealed with a Menzerna Protection product.
